

Qustodio Parental Control 2015 Launches with Four New Features for Android

Location Monitoring, App Controls, SMS and Call Monitoring and Incognito Mode Detection Headline New Android Additions to Qustodio Flagship Product

BARCELONA, SPAIN – October 14, 2014 – Qustodio, a leading parental control software company for families worldwide, today announced that it has launched Qustodio Parental Control 2015 with four new features aimed at keeping kids safe while they are online and using their Android mobile devices.

Qustodio Parental Control 2015 is a full featured, multi-platform solution for the management of children's online devices and activities. It supports all major desktop and mobile platforms including Android, iOS, Mac, Windows and Kindle. New product additions for the 2015 product include several key features specific to Android:

New for 2015:

- **Location monitoring:** Monitor the location of your child on Android devices
- **App controls:** Block or limit the use of applications on the desktop or apps on the Android
- **SMS and Calls monitoring:** Keep track of calls and messages on Android devices
- **Incognito Mode Detection:** Block kids from using incognito mode on Android without having to install any special browser

Other product features of Qustodio Parental Control 2015 that have been part of the product include:

- **Multi-Platform:** Works on Windows, Mac, iOS and Android
- **Real time web-filtering:** Does real-time inspection and blocking of inappropriate content
- **Cross device time-limits:** Set one time limit across all devices or for a particular user
- **Safe Browsing:** Enforces and monitors safe browsing activity across all platforms.
- **Social network monitoring:** Keep track of kids' activity on Facebook

Qustodio Parental Control 2015 is available as both a free and premium product. All new users have access to all paid features for several days, after which users will need to decide to remain free or to go paid. With the free product, users get web filtering, time limits and can monitor up to one device. With the paid version (\$44.95 for a one year license), up to five devices can be monitored and users have access to more advanced controls such as SMS monitoring and app blocking and scheduling. “Keeping kids safe online is one of the most difficult tasks for parents these days,” said Eduardo Cruz, CEO and co-founder of Qustodio. “There are a lot of single-feature parental control apps out there in the marketplace, but there are very few solutions that are robust enough to cover the needs of parents across multiple devices. There is no other product in the market that has this level of functionality and gives it away for free, and that is something we’re very proud about.”
